Availability: **Part-time** / **Internship** | Work authorization: **Student residence permit, eligible for part-time**

## Profile

MSc Economics candidate (AUEB) with strong quantitative background, including econometrics & probability foundations, and practical Python/SQL. Completing a Python-based dissertation on stochastic volatility, using Bayesian methods and MCMC. Open to entry-level data roles (intern/part-time); ready to contribute across the data workflow while learning fast.

## Skills

**Programming:** Python, SQL, R;

**Libraries:** pandas, NumPy, SciPy, matplotlib;

**Statistics/ML:** Regression, time series analysis, Bayesian statistics, MCMC;

**Tools:** LaTeX, Excel, Jupyter, Git

## Education

**Athens University of Economics and Business (AUEB)** 2023–Present  
MSc in Economics - GPA: 8.67/10. Key coursework: Large Data & statistical learning; Data Analysis & Applied Econometrics.

**French University in Armenia (partner: Jean Moulin Lyon 3)** 2014–2018  
BSc in Economics (Commerce) — Diploma with Honor, awarded for academic excellence.

## Selected Projects

**MSc Dissertation - Stochastic Volatility with Bayesian Methods (Python)** 2024–Present

- Estimated volatility models relevant for forecasting risk/uncertainty in financial data; compared several Markov chain Monte Carlo (MCMC) approaches for speed and stability.
- Work-in-progress repository with code and example runs. Link: <https://github.com/YOUR-HANDLE/SV-MCMC>

**Large Data & Statistical Learning (R)** 2024

- Analyzed Eurostat monthly indicators for EA20, DE, NL, IT to understand activity trends; built simple coincident indicators via PCA and checked that they tracked industrial production over time.
- Identified influential drivers of industrial production using subset/stepwise selection and penalized regressions (Ridge/Lasso/Elastic Net); compared patterns across countries (R: `glmnet`, `pls`, `leaps`).

## Experience

**Logistics Coordinator (Freight Brokerage & Operations)** | Wells Brothers Nevada Corporation (Armenian Branch), Yerevan 2022–2023

- Oversaw end-to-end brokerage operations: customer acquisition, rate negotiation, carrier performance regulation, and on-time execution.

**Logistics Coordinator (Freight Brokerage & Operations)** | Kata Company, Yerevan 2020–2022

- Matched customer loads with vetted carriers, resolved operational issues to maintain service levels.

## Languages

Armenian (Native)   English (C1)   Russian (B2)   French (B1)

## Service

Mandatory military service (Republic of Armenia) 2018–2020
